System Diagrams

Printing & Food System

GitHub renders the diagrams in this file automatically (Mermaid format). PNG versions are in `docs/img/diagramas/en/` for Word documents or slides. Each diagram's source code is in `docs/diagramas/en/`.

> Database table and field names are in Spanish because that is how they appear in the code (e.g. `pedidos` = orders, `catalogo` = catalog).

---

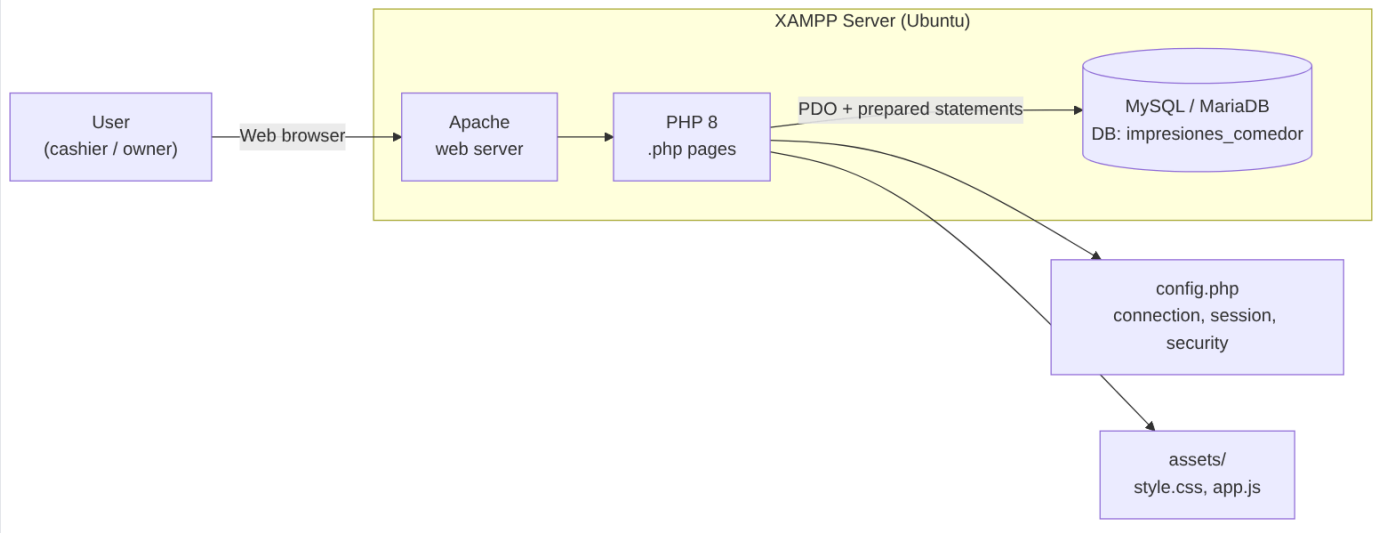

1. Entity-Relationship Diagram (database)

The 4 tables of the `impresiones_comedor` database and their relationships.

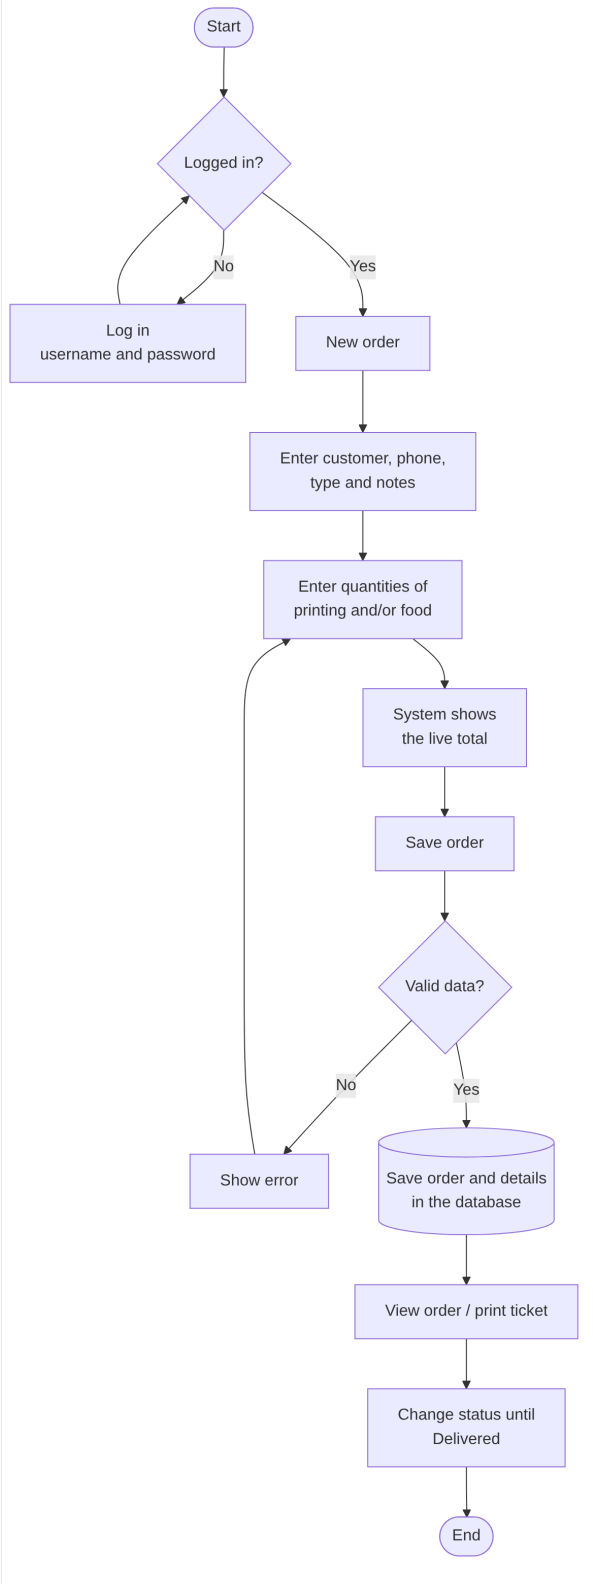

2. System Architecture

The user works in a web browser; Apache runs PHP; PHP reads and writes to MySQL.

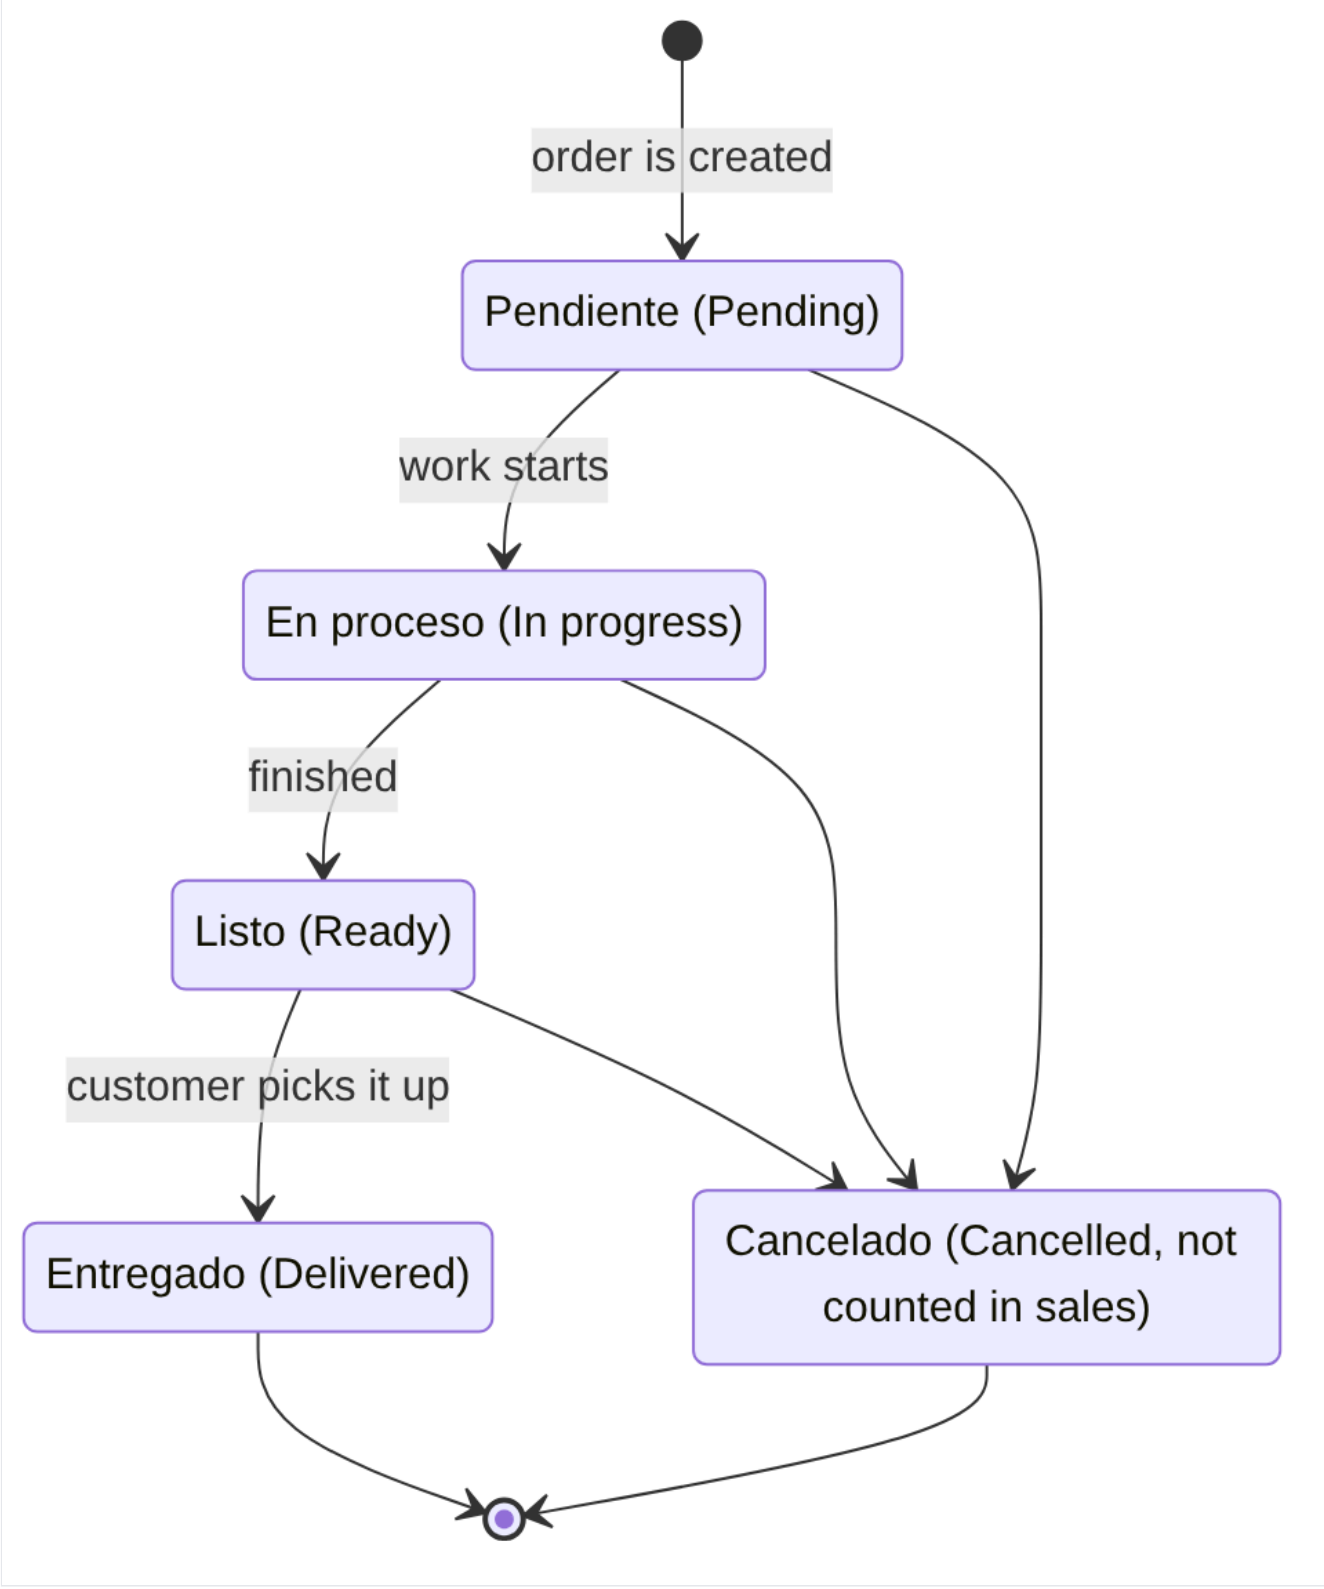

3. Flowchart: registering an order

Steps from the moment a customer arrives until the order is delivered.

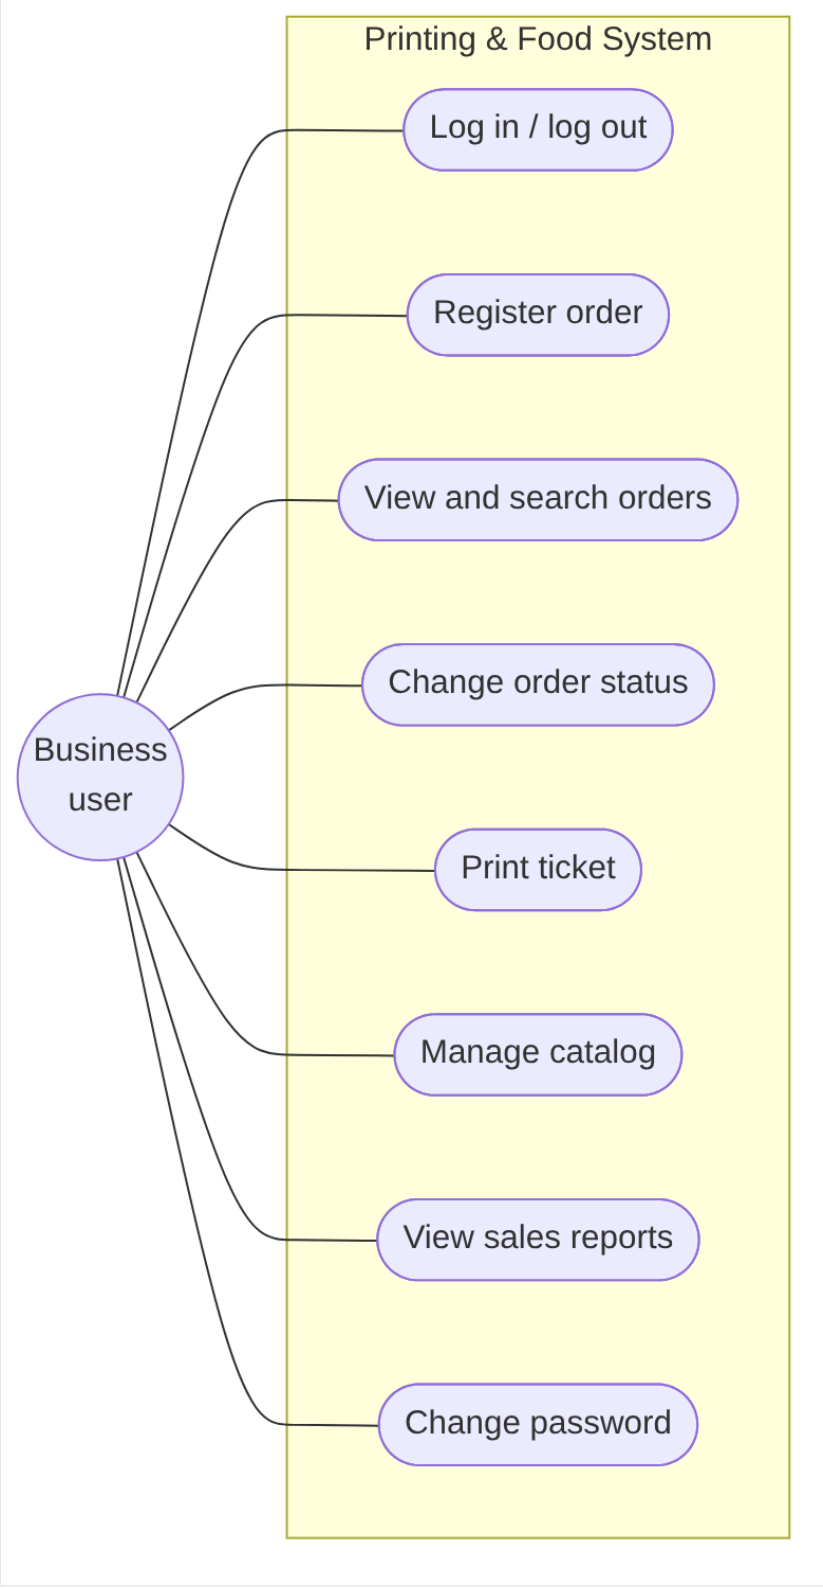

4. Order State Diagram

States an order goes through.

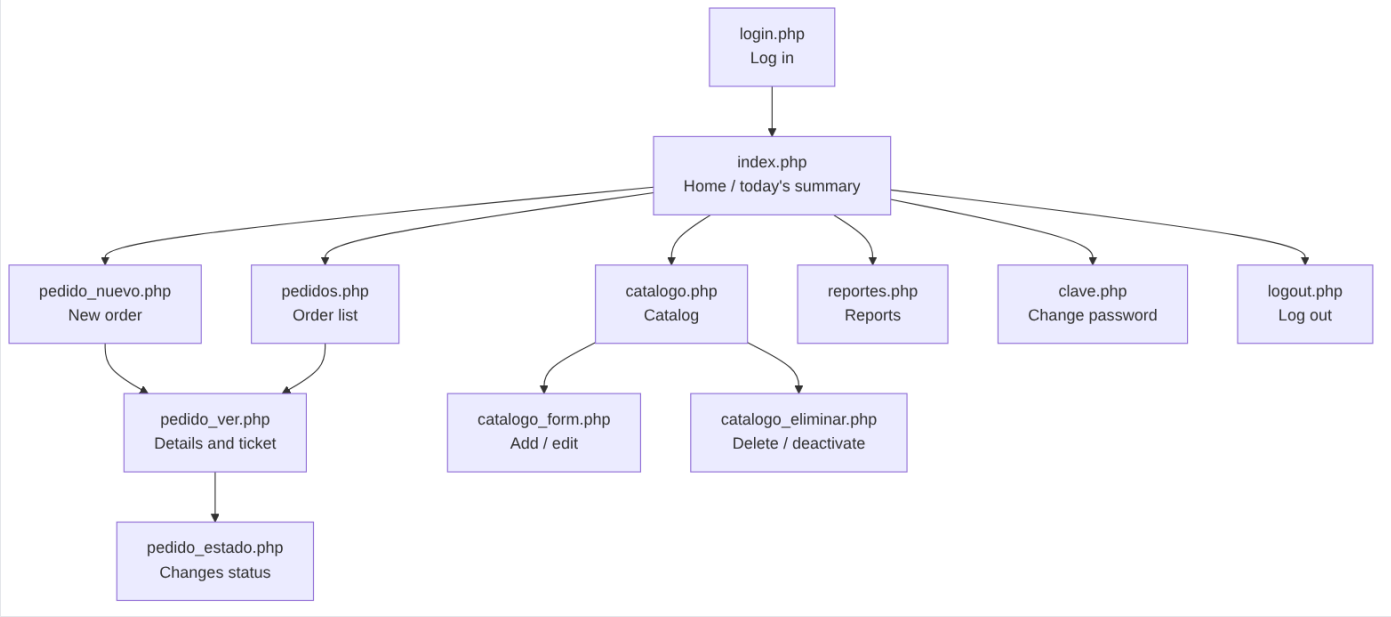

5. Use Cases

What the user can do in the system.

6. Site Map

How the system pages are connected.
